### DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claim 2 is directed to a rubber blanket *per se* while dependent claim 8 requires a clamping device which does not form any part of the rubber blanket structure. Thus the metes and bounds of claim 8 is unclear as to whether claim 8 is drawn to a rubber blanket or is drawn to a combination of a rubber blanket and a clamping device.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kunkel et al(4,707,902). The patent to Kunkel et al teaches the method and structure of a blanket being attached to a blanket cylinder by aligning the cut outs in the blanket with the register pins of a clamping device on the cylinder. See Figs. 1-9 in Kunkel et al for details.
5. Claims 2-8, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Philpot(5,088,408). The patent to Philpot teaches a rubber blanket 12 as claimed including a clamping bar section 22 attached to the underside of the rubber blanket 12 and having cut-outs 20 formed thereon to be engaged with pins of a clamping device on a cylinder when the blanket

Art Unit: 2854

is attached to the cylinder. See Figs. 1-8 and column 6, line 36 through column 7, line 29 in Philpot for details. With respect to claim 7, on lines 29-35 in column 9, Philpot teaches to attach the rubber blanket 12 on the clamping carrier sheet using an adhesive. With respect to claims 10 and 11, the only structure recited for the claimed printing machine or varnishing machine is a rubber blanket which has been met by the rubber blanket structure of Philpot.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
